

ReinSaat® variety development:

REIN SAAT New breeding Cocktail tomato Donatellina

Donatellina is a medium-early plum-shaped tomato of indeterminate growth which convinces with high yields. Its fruits are intensely red and have a crunchy, burst-resistant skin. Donatellina has firmly fleshed and pressure-resistant fruits with an excellent, sweet and fruity tomato flavour. The fruits are characterized by a relatively long shelf life and stockability.

With a fruit weight of 15 g, Donatellina is an excellent snack tomato. The fruits sit firmly on panicles and can also be marketed as tomatoes on the vine. The plant owes its cultivation stability to its resistance to the tomato mosaic virus, the tomato late blight and the tomato leaf mould.

Donatellina forms strong, indeterminate plants with short internodes and airy foliage. On account of its loose growth it is ideally suited for greenhouse cultivation. The shelf life of the fruits as well as the shelf life after the harvest are both typical.

Fact sheet:

Growth:	indeterminate
Fruit shape:	oblong-oval
Fruit size:	3.5/2 cm
Fruit colour:	glowing red
Fruit weight:	about 15 g
Taste:	sweet aromatic and fruity
Maturity:	medium early
To be harvested as:	single fruit without the calyx, on the panicle
Usage:	for all forms of marketing
Resistant to:	tomato mosaic virus, tomato late blight
Shelf life:	very good
Recommended cultivation:	greenhouse, protected outdoor locations
